Prescription for Change
Prescription for Change

The 1997-1998 Yearbook illustrates the emergence of many noticeable changes at the Medical College of Virginia (MCV) Campus. The one which appears to be of greatest immediate impact to students is the mandated name change of our campus to reflect the unification of the Virginia Commonwealth University (VCU) and the Medical College of Virginia. The legacy of excellence in healthcare professional education at the MCV campus is a feature that students are proud to uphold. As such, the letters known as MCV mean a great deal and it has been a difficult transition for students. It is also clear that VCU is a growing institution with a dynamic present and future. Thus, while the academic and medical campuses may be miles apart geographically, the campuses have had a singular purpose, since 1968, in offering students educational experiences designed to prepare them for the real world. This mandated name change is reflected on the cover of the yearbook, as for the first time in its history, the yearbook cover bears the name; Virginia Commonwealth University.

The Skull & Bones Restaurant closed its doors after serving as a haven for students to meet, discuss their experiences at MCV and forge lifelong friendships. The restaurant offered inexpensive, soul-satisfying fare to students, faculty, hospital staff, patients and their families. Famous for platters piled high with crispy onion rings and tangy homemade limeade...the Skull & Bones will be missed by all!

The MCV Hospitals underwent a change in its management structure. A business venture designed to ensure that MCVH can continue to meet the challenges of healthcare reform, maintain its reputation of excellence in the medical marketplace and continue to provide outstanding educational opportunities to healthcare students from across the nation and around the world.

We have faced many challenges and changes in ourselves and in our lives as we have progressed towards our goals as healthcare professionals. We will continue to do so as we leave VCU/MCV and enter into the workforce. But, we must remember that whatever challenges we may face; whatever name our school carries; whatever changes that may affect us; we must remember who we are and what we represent. It is not the "powers that be" that direct our lives, we do. We must each write our own "Prescription for Change" and strive to make a difference and improve the world around us.

Dear Students and Soon-to-be-Graduates,

Realizing your goal of becoming a nurse or completing the program for a new academic credential in your chosen profession is truly an exciting time!

The 1990's have been chaotic years for health care. In light of the economic, social and political forces that have become more visible in shaping the nature of the system, the future seems unpredictable. As you view these changes, however, you should feel optimis-tic about your place within whatever structure emerges. It is clear that now, as never before, nurses and nursing are being viewed as knowledge workers. No longer are we viewed as doers who happen to think, but rather as thinkers who happen to do.

You are among the best educated nurses in a system which now understands the importance of an educated workforce. The ever-changing world awaits you -- step forward and claim your rightful place as invaluable members of the health care team.

Best Wishes,

Dean Langston

The instructors at the VCU/MCV School of Nursing are among the finest in the country. Many of the faculty are involved in conducting research, publishing, public service and clinical practice in addition to their teaching responsibilities. By setting the standard for nursing, in creating a vision of excellence and self-involvement, the faculty serve as exemplars to the students. Unable to picture all of the faculty here, the students wish to extend their appreciation to all staff and faculty for their hardwork and dedication.

Thank You

We would like to thank several people for their help with this year's yearbook. First, we would like to thank Tina Kariotakis from the Josten's Yeartech company. Tina proved to be a valuable asset and was a great help to us in preparing this yearbook.

Secondly, and most importantly, we would like to thank Mr. James Miller, our yearbook adviser and Student Activities Director. He and his staff bent over backwards to make sure we had everything we needed to complete this yearbook.

Lastly, we would like to thank all the students that submitted photos. The yearbook would not have been possible without you!

Thank you all,

From the Editors....

The year of 1998 promises to be full of many changes. We graduate. We move on to our long awaited careers. We begin our roles as healthcare professionals. We say goodbye, but not farewell, to friends and colleagues met along the journey. We take with us rich experiences of our education at the MCV Campus of VCU, and with this, a broadened vision of the future of healthcare.

I would like to extend my heartfelt thanks to my husband, Steve. I simply could not have made it through, not only the daunting task of completing this yearbook, but these last several, difficult, financially-draining, exhausting years without his love and support. I would like to recognize my kids; Steven, Chris and Bobbie. They are all great kids and it has been hard for them not having Mom around all the time. They have always been supportive and I hope I have made them proud!

I would like to thank Marybeth and Joyce for their help in compiling the yearbook. Also, a special thanks goes to my friend, Kara McDowell. Kara was always there to listen to my whining and complaining and was a good friend to me throughout my years at MCV.
